Dear Dr. Green:

I am writing to ask you
on the subject of prepaid medical
their impact on medical care and an
update for a series of studies on the
1981 for the Henry J. Kaiser Family Foundation.

Your participation in this research is very important to us, to the success
of the project, and to the accurate representation of the views of physicians
like you. We would like to conduct a telephone interview with you, at your
convenience. We'd like to assure you that your participation in this study will
be kept strictly confidential and that the results will be analyzed and reported
only in aggregate form.

Although we realize we cannot fully compensate you for your time, we are
happy to offer you a modest monetary token of our appreciation for your contribution
to this research project. We will also send you a full report of the findings
from this study when it is completed in early 1985.

One of our executive interviewers may be calling you shortly to interview
you. I think you will find the study of personal as well as professional interest,
and hope that you can give it your consideration.

Sincerely,

Louis Harris
